

Take a Small Step
**MAKE A
BIG IMPACT**

Save leaves, adopt a leaf composter and help nourish the earth. You as a conscious citizen can make a difference. Take the first step and inspire your peers.

You are aware that a large amount of leaves are burnt during winters creating a negative impact on health and the environment. Avoid burning dry leaves or sending it to the municipal land fill. Instead opt for leaf composters. Converting dry leaves to earth friendly and odourless manure is simple. Help us spread the idea.

**Now you are ready to lead the way.
Our staff is ready to decode it for you.**
